Complete Solution for Poultry

Plasson is a public company, founded in 1963 and is engaged in the manufacturing and marketing of high quality equipment and complete package projects for poultry.

Since 2004 Plasson has been successfully offering a complete poultry equipment package to integrations and growers around the globe.

Plasson offers specialized unique packages for Floor & Cage Broilers, Pullets, Breeders, Turkeys & Poults, Ducks and others, and integrates these packages in houses world-wide, increasingly offering steel construction as well from its own dedicated factory.

Plasson designs high quality long lasting equipment ensuring excellent results. Having the expertise and understanding of both the growers and birds requirements, Plasson takes a unique stand among equipment suppliers, by designing a World-Leading Equipment Package tailored to each customer's requirements and climatic conditions, thus providing high yields and optimal economic results.

Plasson Watering Systems are a complete watering solution from the water source to the animal, offering unique products such as the Plasson Grey Nipple with Tray and the famous Bell Drinker. Plasson nipples can supply the highest flow on the market ensuring accurate and adequate amounts of water for the birds, especially when coupled with Plasson's unique and patented Water on Demand Pro system that ensures that the water pressure is adjusted according to the actual consumption.

Plasson's No-Grill Automatic Feed pan is part of the full Plasson Feeding System and enables easy access to the feed while preventing feed spillage. Additional features include - Hopper filling programming, unique Tee Drop, High Cone and others. All designed to bring the best results.

Plasson's Climate Package includes a wide array of equipment that provide comfortable conditions for the birds and energy efficient systems. Plasson has worldwide experience in hot, cold and humid climates that ensures that the climate package will be suitable for your requirements.

The package includes:

- Climate Controllers
- High quality Exhauster and Circulation fans
- Tunnel Doors or Curtains
- Cooling Pads
- Heaters – Cannon, Space, Brooders, Radiant tubes
- Sprinklers / Foggers
- Inlet systems
- Additional components - Electric Cabinets, LED Lighting

Plasson Breeder package includes all the above equipment and in addition the Plasson Breeder nest system – Plassnest, that supports growing with or without slats and a suspension system for training at the beginning of the flock and for cleaning the house at the end of the flock.

Plasson is now offering **One-Stop-Shop** turnkey solutions that include the house structures and panels. The special structures are designed for a span of up to 18m. without support in the house center.

The structures are lightweight come with predesigned elements for the equipment and enjoy a competitive price. Completing the offering are the Plasson Partners, providing construction and assembly together with the Plasson support center.
