

Double Seal Plug for Pressure Indicator Tube

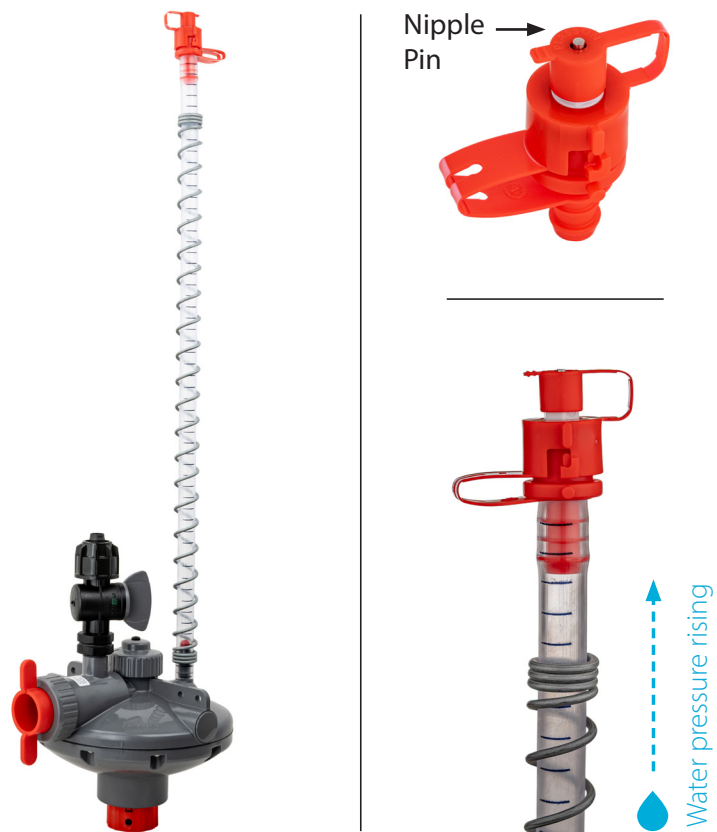

Plasson Double Seal Plug for Pressure Indicator Tube is designed to release air.

Key Features & Benefits:

- Improve sealing of the Sight Tube when using high pressure flush of the Nipple Watering Lines.
- Enables cleaning the Sight Tube with a brush, by opening the bayonet.
(Brushing assists with decreasing bacteria and contamination inside the Sight Tube.
Brush is available from Plasson).
- Prevents the Float Ball from sticking to top of the Sight Tube when flushing.
- Made of high-quality long-lasting materials (resistant to chemicals and vaccine components).

How does it work?

During high water pressure the Nipple Pin allows trapped-air to be gradually released.

Compatibility

The Double Seal Plug for Pressure Indicator Tube is compatible for all Plasson Sight Tubes.

Fits tube internal diameter $\varnothing 12$ mm
