

## Egg Counter

### Characteristics of the Camera-Based Egg Counter

- Proven accuracy above 99.7%
- Does not require programming, integration with CLPs, panels, or wiring
- Simple installation with no programming required
- Wi-Fi connection to the internet or other systems
- Works with two independent counters showing the right and left side
- Designed for any kind of belt, from 10cm to 100cm width
- Installed 50 cm above the eggs, thus enabling belt maintenance
- Supports the return of the belt or eggs up to 25cm without counting the same egg twice
- 5" color touchscreen display
- Auto-reset every day at midnight
- Not sensitive to electrical grid or solar disturbances
- Does not require belt deviations or tapering
- Simple installation by screwing the rack and connecting to the power outlet
